General Information

Circular 14 and the provision of textbooks

1 Circular 14, **Textbooks**, an annual publication issued by authority of the Minister of Education, lists textbooks approved for use in the schools. Wherever possible, these lists will include books written by Canadian authors and printed and bound in Canada.

2 Two of the criteria for the selection of books for listing in the Circular are that the content should be of sound scholarship and contemporary relevance, and that the approach should be broadly consistent with the Departmental guidelines which offer a framework upon which courses of study can be developed to suit the local and Canadian environment. Thus Circular 14 may be considered as an instrument to assist in the improvement of instruction and learning.

3 The system of multiple listing of approved textbooks attempts to maintain flexibility in the selection of titles in order to accommodate individual differences among pupils. It is a truism of modern education that if all pupils are to be challenged to the full extent of their capabilities, and that if pupils differ in the manner and rate in which they learn, no single textbook will serve all the pupils in a given grade in any given subject. The involvement of teachers, department heads, and supervisory personnel in the selection of textbooks can therefore be a most effective means of in-service education. All textbooks listed for a subject should be evaluated before the principal selects titles for local use.

4 When a new book is published, the publisher submits copies to the Curriculum Branch for evaluation. The Department then sends a copy to each of several readers or critics for comments and criticisms. The books are examined in the light of certain established criteria, and reports are submitted to the Department. When the reports are received, they are reviewed in detail, and a recommendation is prepared.

This process takes some time, but it is necessary to ensure by thorough examination that only the best textbooks are put into the hands of students.

5 (a)

Textbooks are those books that boards are required to provide in numbers sufficient for the use of pupils. Pupils cannot be required to buy such books, except in the case of courses leading to the Secondary School Honour Graduation Diploma.

(b)

In all subject areas for which books are listed in Circular 14, textbooks must be selected from those listed in Circular 14, unless permission for another selection has been granted by the Minister.

(c)

In those subject areas and programs for which no textbooks are listed in Circular 14 (for example, English literature, littérature française, the "authors" in modern languages and classics, and special education), textbooks to be provided by the school board are to be selected by the principal in consultation with the teachers, and the selection approved by board resolution.

Where textbooks are to be selected locally under Section 5(c) of Circular 14, preference should be given to books by Canadian authors or editors, printed and bound in Canada.

Although the titles of books to be used in English literature courses are not shown in Circular 14, the full title (and the name of the particular edition if such is required) should be included in the list submitted by the principal to the board for approval. If a particular edition is required, the cost involved should be considered in the choice, and the price drawn to the attention of the board when formal approval is sought.

(d)

Requests for permission to use textbooks not listed in Circular 14 or not covered under Section 5(c) of that Circular must be submitted by the chief education officer for a school board to the Regional Director of Education for the attention of the provincial Director of Curriculum.

(e)

New or experimental courses not included in the rationale of existing Departmental guidelines require approval for purposes of credit towards an Ontario school graduation diploma. Permission is also required for the use of textbooks to be used in connection with new or experimental courses, exclusive of courses leading to the Secondary School Honour Graduation Diploma.

The chief education officer for a school board will send a request for approval to the Regional Director of Education, along with an outline of the nature of the studies to be undertaken, the level at which the course will be given, the textbooks and reference materials proposed for use, and the intended date of introduction of the course.

The Regional Director will enlist the assistance of the program consultants and central office curriculum personnel in examining the course. At the same time, central office curriculum personnel will consider the proposed textbooks.

Requests for approval must be sent well in advance of the proposed introduction of the course.

In the case of new or experimental courses leading to the Secondary School Honour Graduation Diploma, in addition to the textbook and reference materials proposed for use, there will also be a statement that the board has approved the use of the textbook and reference materials. (See also page 69.)

(f)

To provide students with a wider choice of some of the more recently developed materials for instruction in second and third languages, and pending the development of Canadian materials, special provision has been made to list several additional textbooks. Because the nature of these textbooks requires use in the classroom before a true evaluation can be made, they are given interim approval pending a more complete evaluation.

continued...

(g)

In certain subjects, the nature of the instructional program or the extent to which the textbook is used by the students, may be such that the board would satisfy the requirement to provide textbooks "in numbers sufficient for the use of the pupils" by supplying class sets, each of which would serve for several classes. Such a situation might exist if it were decided to use a number of reference books instead of a single prescribed textbook. It would also apply to subjects in which regular homework assignments were not required.

(h)

Boards are urged to provide schools and/or classrooms, upon recommendation by the principals and supervisory personnel, with

(i)

one or more reference copies of texts listed in Circular 14 other than those adopted as pupil textbooks,

(ii)

one or more copies of reference books chosen by teachers from Schedule E of Circular 14 or from the appendices in Departmental guidelines.

(i)

In evaluating books, teachers should understand that the most recent addition is not necessarily the best book on the list; it may merely present a different approach to the subject.

If a policy of continuous evaluation is in operation locally, the school is able to replace the least satisfactory texts, or to experiment with new or different texts, without having to discard usable textbooks. Assuming that about one-third of the textbooks must be written off annually as unserviceable, the replacements, if the principal and teachers so recommend, can be new or different books.

6

Since it is impossible to synchronize the times of publication of new books with the date of issuing of Circular 14, the approval of new books submitted to the Department after the issuing of Circular 14 is announced in supplements to that Circular. The announcement of a new book by means of a supplement does not imply that the book should replace the one in current use. The purpose of a supplement is rather:

(a)

to inform teachers and principals of the approval of a textbook for a new guideline for which there has not previously been an approved book, or

(b)

to indicate approval of an additional title which is to be added to those listed in a given category. It is from the augmented list that the principal and teachers will make their selections the following year. The periodic approval of new books allows the teacher more time for careful evaluation than is possible if all new titles were announced at one time.

In approving the purchase of textbooks, boards are reminded that the legislative grant for textbooks is included in the grants for ordinary expenditure.

Books selected from Circular 14 and purchased by a school board remain the property of the board. When these books are loaned to the pupils, they should be collected at the end of the school year so that they may be used again. In all cases the schools should see that proper care is taken of the books, keeping in mind that they belong to the board and are intended to be used for more than one school year.

Selection of Textbooks

Extracts from The Acts and Regulations

The following extracts from the Acts and Regulations pertaining to the administration of education in Ontario relate to textbooks. For accurate reference, recourse should be had to the Statutes of Ontario.

The Department of Education Act

12 (1)

Subject to the provisions of any statute in that behalf and to the approval of the Lieutenant Governor in Council, the Minister may make regulations with respect to schools or classes established under The Public Schools Act, The Separate Schools Act, The Schools Administration Act, The Secondary Schools and Boards of Education Act, or this Act, or any predecessor of any such Acts, and with respect to all other schools supported in whole or in part by public money,

4.

requiring boards to purchase books for the use of pupils;

33.

governing the selection and approval of textbooks, library books and reference books for use in Grades 1 to 13 inclusive.

The Schools Administration Act

20 (1)

A teacher shall not use or permit to be used as a textbook in a prescribed subject in an elementary or secondary school any book that is not approved by the Minister or the regulations, and the Minister, upon the report of the inspector concerned, may withhold the whole or any part of the legislative grants in respect of any school in which an unapproved book is so used.

(2)

Where a teacher uses as a textbook, or negligently or wilfully permits to be used as a textbook by the pupils of his school, in a

prescribed subject, a book that is not approved by the Minister or the regulations, the Minister, on the report of the inspector of the school, may suspend the teacher and the board that operates the school may deduct from the teacher's salary a sum equal to so much of the legislative grants as has been withheld on account of the use of the book or any less sum at its discretion.

(3)

Subject to the written approval of the board that operates the school, a teacher may replace any approved textbook that is in actual use in an elementary or secondary school by any other approved textbook on the same subject.

22 (2)

It is the duty of a principal, in addition to his duties as a teacher,
(f) to prevent the use by pupils of textbooks that are not approved under the regulations;

34.

Every board shall,

(11)

provide, without charge, for the use of the pupils attending the school or schools operated by the board, the textbooks that are required by the regulations to be purchased by the board.

Regulation, Elementary and Secondary Schools—General

7 (1)

Subject to the approval of the board, the principal shall select from the approved list of textbooks, the textbooks for the use of pupils in Grades 1 to 12, both inclusive.

(2)

Where no textbook for a subject is included in the approved list, the principal shall select suitable textbooks where required and such textbooks that are being introduced for use in the school for the first time shall be subject to the approval of the board.

(3)

A board shall purchase and provide without charge and in sufficient quantity, the textbooks selected in subsections 1 and 2 for the use of pupils in Grades 1 to 12, both inclusive, in schools under the jurisdiction of the board.

Availability of Textbooks

To ensure an adequate supply of textbooks in time for the opening of school in September, it is recommended that orders should be forwarded to the publishers by the end of April, 1972. The orders may specify a delivery date that will coincide with the time the books are needed in the schools. If books are ordered early, publishers can plan reprints in time to avoid shortages.

Where books for courses leading to the Secondary School Honour Graduation Diploma are supplied through local retailers, it is suggested that the books be ordered early, with a convenient delivery date specified. In a few localities, it is understood that some retail stores have discontinued the sale of textbooks. It may now be necessary for some schools to order directly from the publishers. Principals are requested to investigate the situation in their localities to ensure that students enrolled in courses leading to the Honour Graduation Diploma have textbooks available to them for September school opening.

Where publishers allow surplus copies to be returned, it is recommended that the surplus supply be sent back as soon as possible, so that the textbooks can be made available in other areas where they may be required.

Books in Large Print

Partially sighted children are those who, even after correction or treatment, still have less than normal vision which may interfere with learning.

The present trend is to enrol these students in the regular classes of their home schools.

The Ontario Department of Education assists with this program by providing those partially sighted students who will be helped by a larger type size with a large print edition of the text required. **Those textbooks which are available in large print are indicated throughout the Circular by the symbol ○.**

If an approved text, not presently available in large print, is required, it will be prepared on request.

An application form for large print books signed by an ophthalmologist (oculist) indicating the amount of vision remaining and the condition or disease responsible for the decrease from normal must be returned to the Low Vision Centre, 1929 Bayview Ave., Toronto 350, before books can be sent to a school. Please note that some partially sighted children are not benefitted by large print books. Therefore, the information on the application form is required to determine the need.

A Program Consultant, Special Education, may authorize the use of large print books for children with learning difficulties, Cerebral Palsy, or for other unusual circumstances.

Application forms are available from any Regional Office of the Department of Education and at the Large Print Library, Ontario School for the Blind, Brantford, Ontario.

The list of books required should be sent to the Large Print Library. Requests for books required for the opening of school in September should be forwarded as early in June as possible. It is most important that this deadline be followed, especially for titles that do not appear in this circular and have to be converted from standard to large print type.

By special request from the principal, available books may be sent out before the end of June for use during the summer vacation.

All books borrowed during the year must be returned **before the end of June.**

Owing to the high cost of producing large print books, schools will be billed for the replacement costs of lost texts.

Further information and requests for Application and Book Order forms should be made through The Superintendent, Ontario School for the Blind, Brantford, Ontario.

Schedule A

Books approved for permissive use— Primary and Junior Divisions

Schedule A contains the titles of books approved for permissive use in the Primary and Junior Divisions of the elementary schools. School boards will be required to provide textbooks selected from Schedule A in numbers sufficient for the use of the pupils.

There is a need to recognize the trend away from the use of a single text per grade as the principal instrument of instruction, and towards the use of a variety of books in any subject area. Educational research has confirmed the fact that there are varying rates and degrees of pupil growth and maturity. Teachers must be provided with an ever-increasing selection of books and instructional materials from which to choose those that meet the differing needs and aptitudes of the pupils.

Similarly, children must have access to an ample variety of print materials if they are to develop facility in choosing those appropriate to their immediate needs.

The Department of Education is presently engaged in a review of all aspects of the curriculum as it applies to the Primary and Junior Divisions. The Curriculum Committee is examining the existing guidelines and studying data collected from educators, parents, and trustees concerning current practices in the schools of Ontario. It is expected that the recommendations of this Committee will be reflected in the policies governing textbooks and other print materials.

Until notice is given to the contrary, the books listed for the Primary and Junior Divisions in Circular 14, and its supplements, are approved only for the year in which they are listed. Publishers should also be free from long-term commitments to keep titles in print.

Accordingly, a publisher is no longer obligated to keep a book in print beyond the calendar year in which it is listed in Schedule A of Circular 14.

The list of books approved for use in the Primary and Junior Divisions has been expanded to include books that do not provide textual material for an entire course, and would, therefore, not qualify as textbooks under a narrow definition of that term. Some books will take a unique approach to the subject, and cover only part of a course of study; others will challenge advanced pupils with a more sophisticated treatment of the course; still others will develop one or more topics in depth and provide enrichment or resource material for some pupils.

Schedule B

Books approved for permissive use— Intermediate Division

Schedule B contains the titles of books approved for permissive use in the Intermediate Divisions of the several types of schools. Pupils will not be required to buy these books. School boards will provide textbooks selected from Schedule B in numbers sufficient for the use of the pupils.

In the selection of texts it is imperative that provision be made for the varying interests, needs, and abilities of the pupils. This will necessitate a degree of flexibility in choice of texts. In history, for example, it will be preferable to provide in each classroom some copies of each of several approved texts, since history is “no body of absolutes,” and pupils ought to have an opportunity to compare a number of viewpoints and interpretations of historical events. In English literature, provision should be made for the study of different texts at a given level in succeeding years, and no attempt should be made to require the same texts to be studied at a given level throughout a school system in any particular year. Failure to provide for flexibility as outlined can result in a rigidity of thinking and a lack of appreciation which are the antithesis of sound educational objectives.

The list of books approved for use in the Intermediate Division has been expanded to include books that do not provide textual material for an entire course, and would, therefore, not qualify as textbooks under a narrow definition of that term. Some books will take a unique approach to the subject, and cover only part of a course of study; others will challenge advanced pupils with a more sophisticated treatment of the course; still others will develop one or more topics in depth and provide enrichment or resource material for some pupils.

Schedule C

Books approved for permissive use— Senior Division—Grades 11 and 12

Schedule C contains the titles of books approved for permissive use in the Senior Division of the several types of schools. Pupils will not be required to buy these books. School boards will provide textbooks selected from Schedule C in numbers sufficient for the use of the pupils.

In the selection of texts to be used in English literature, in the authors studied in modern language courses, in other subject areas where texts are needed, and where no titles are included in the approved lists in Circular 14, it is imperative that provision be made for the varying interests, needs, and abilities of the pupils. This will necessitate a degree of flexibility in choice of texts among the varying courses, and classes. In history, for example, it will be preferable to provide in each classroom some copies of each of several approved texts, since history is "no body of absolutes", and pupils ought to have an opportunity to compare a number of viewpoints and interpretations of historical events. In English literature, provision should be made for the study of different texts at a given level in succeeding years, and no attempt should be made to require the same texts to be studied at a given level throughout a school system in any particular year. Failure to provide for flexibility as outlined can result in a rigidity of thinking and a lack of appreciation which are the antithesis of sound educational objectives.

The list of books approved for use in the Senior Division has been expanded to include books that do not provide textual material for an entire course, and would, therefore, not qualify as textbooks under a narrow definition of that term. Some books will take a unique approach to the subject, and cover only part of a course of study; others will challenge advanced pupils with a more sophisticated treatment of the course; still others will develop one or more topics in depth and provide enrichment or resource material for some pupils.

Schedule D

Some books in use with courses leading to the Honour Graduation Diploma

Schedule D contains the titles of some of the books for use with courses leading to the Secondary School Honour Graduation Diploma. This list is not necessarily complete, nor is it intended to be restrictive. It should not be interpreted as limiting the teacher's freedom of choice, subject to the approval of the board.

The list of these books has been expanded to include books that do not provide textual material for an entire course, and would, therefore, not qualify as textbooks under a narrow definition of that term. Some books will take a unique approach to the subject, and cover only part of a course of study; others will challenge advanced pupils with a more sophisticated treatment of the course; still others will develop one or more topics in depth and provide enrichment or resource material for some pupils.

Schedule E

Primary, Junior, Intermediate, Senior Divisions Supplementary and Reference Books

Schedule E contains the titles of books that do not qualify for inclusion in previous schedules. However they are of sufficient merit to warrant inclusion in school libraries or as classroom reference books. Teachers are referred to the several curriculum guidelines which list additional reference books for teachers and pupils.

Schedule E will not be included in future editions of Circular 14. Beginning in 1973, books in this category will be listed in Circular 15 only.

Supplementary and Reference Books
